

EDUCATION

Sri Krishna Arts and Science College	2021-2026
<i>M.Sc. in Software Systems(Integrated Course) CGPA 8.6</i>	<i>Coimbatore,Tamilnadu</i>

WORK EXPERIENCE

HashInkludes	Dec 2025 – Present
<i>Software Developer Intern</i>	
- Contributing to the development of a Learning Management System (LMS) - Developing and maintaining application features and modules - Assisting in backend and frontend development tasks - Collaborating with team members to see requirements and fix issues	

TECHNICAL SKILLS:

Programming Languages : <i>Java, JavaScript ,and SQL.</i>
Development : <i>React.js, Node.js (Express.js), MongoDB, REST APIs, Next.js, AWS (S3), Git and GitHub.</i>
Coursework : <i>Data structures and algorithms , Database Management System, Object-Oriented Programming (OOP) and Operating systems.</i>

PROJECTS

Captions Craft <i>React, Next.js, Tailwind CSS, AWS S3, AWS Transcribe</i>
- Implemented automated video captioning using AWS Transcribe, improving accessibility for video content. - Built an interactive correction feature that lets users fix mis-transcribed words and instantly update synced captions in the video, addressing the fact that no transcription system is 100% accurate.
LinkMate <i>React, Next.js, Tailwind CSS, AWS S3, MongoDB</i>
- Built a modern portfolio builder with customizable sections, drag-and-drop link management, and a clean, professional user experience. - Created a real-time analytics dashboard that tracks link, social, and project engagement with daily and lifetime insights. - Increased overall performance by 40% through efficient caching, optimized data flows, and non-blocking analytics; implemented strong security and safe user data handling.
AI-View <i>React, Node.js (Express.js), PostgreSQL,Vapi-AI and Gemini-AI</i>
- Engineered a smart setup flow that uses user-selected role and company to prompt Gemini AI for tailored interview questions and personal simulation. - Built a post-interview analytics module to score responses and generate personalized improvement feedback.

ACHIEVEMENTS AND CERTIFICATIONS:

- Solved 300+ problems in Data Structures & Algorithms on GeeksforGeeks and LeetCode, strengthening problem-solving and coding efficiency. - Completed React – The Complete Guide (Next.js, Redux), gaining hands-on expertise in frontend frameworks. - Certified AWS Certified Cloud Practitioner with experience in cloud-based storage and integrations.
